- The prices shown in this price-list are ex-works our factory and do not include VAT. Our products are delivered palletised (no refund pallets) and shrink-wrapped.
- Non refundable pallets (with exception of the products included on the grey pages). GREY PAGES: the charge for each pallet is 15,00 € of which 12,00 € will be paid back if the pallet is returned in good condition.
- All products can be collected at our warehouse in Nules (Castellón) with an extra charge of 15€ per pallet. The orders to be loaded in Nules for quantities less than a full pallet will be charged at the same transport cost as a full pallet.
- **The orders that are loaded at our warehouse in Nules will be ready to be loaded in maximum three working days from receipt of the order confirmation. These orders will be invoiced as if they had been loaded and delivered to the customer.**
- Verniprens SA reserves the right to load the goods in its factory in Llocnou de Sant Jeroni when appropriate and to not send the goods to its warehouse in Nules.
- The material is sold ex-works and the buyer bears the risk of the transport. The goods must be checked by him when delivered. If necessary, the client should submit a written complaint to the carrier. Therefore Verniprens SA is not responsible for any breakage occurred during transport or handling during transport.
- Returns of goods will not be accepted. Only under acceptance of Verniprens SA full pallets of goods can be returned. In this case, a 30% depreciation rate will be applied.
- Orders for any goods for a value of less than 150 € will require payment by bank transfer on the confirmation of the order.
- For orders being loaded by transportation agencies that require special packaging, there will be an extra cost of 10 €.
- No claim will be accepted 15 days after delivery of the goods.
- **No claim will be admitted after the installation of the goods: claims should be submitted imperatively before the installation.** Any claim must IMPERATIVELY BE MADE BEFORE INSTALLATION of the materials. If damaged or defective product were installed, Verniprens SA will not be liable and would only accept to replace the defective ones.
- The fact of placing an order to us implies the knowledge and full agreement of the above conditions of sales and, in case of dispute, the submission to the Gandia's jurisdiction (Valencia).
- The goods are sold with a transfer of ownership title retention clause till their full payment.
- Following current regulations and being committed to the environment, we have a box packaging system (wall claddings) that allows them to be returned to the factory for reuse.

VERY IMPORTANT

- The weights and sizes indicated in this price-list are approximated and the space for the joint is already included in the calculation of the pieces per square meters.
- **Since the raw materials used in our products are of natural sources, shade differences may exist, which do not affect the physical characteristics or the qualities of the products.**
- Due to a high content of cement, superficial microfissures may appear on some products, which does not constitute a defect.
- Due to a possible chemical reaction of the cement with the carbonic gas from air, under some atmospheric conditions, carbonatation or efflorescence may appear on some products: this does not alter the quality of the goods and cannot be considered a defect.
- Regarding floor and wall tiles, we recommend mixing the pieces of different boxes of pallets, since our products are made of natural raw materials and differences in colour shades may exist. The material has to be installed with 2 to 10 mm joints, depending on the products.
- For a correct conservation, we do not recommend under any circumstances the use of any acid, abrasive solvent or any other product that might deteriorate the cement.
- To prevent water infiltrations, moss growth or penetration of stains we recommend the use of water repellent products, once the work finished.
- In order to prevent future damage of the pieces, please ensure a correct maintenance of salt water pools due to the high degree of corrosion of some of its components.
